

# TEEN MOVERS

## Community Service - Fundraising Project

*General Information*

## TEEN MOVERS

This is a great project for your older group members. The primary purpose of this activity is to help relocate people who do not have the equipment to do it themselves, or can't afford to pay a professional moving company. Donations can be accepted, making this a fundraiser, as well as a community service project. It's a great way for your teens to help some members of their church and community. Just put the word out that you have a team available to help people with their moving needs. Provide contact information for the project coordinator, and schedule your team to help so that it is convenient for the client.

Make sure that the youth you use are old enough and mature enough to do this type of project. Remember they will be handling people's personal belongings, and some may be fragile, heavy, and/or awkward to handle.

Consider taking your group out for ice cream or pizza after the project.

### **Items needed:**

Vehicles to haul the client's belongings.

Rope or other types of tie downs, moving blankets or the equivalent, furniture dollies.

Volunteers to drive the vehicles and help load and unload. Make sure the drivers are adults and have experience driving the type of vehicles that are being used. Understand there is a level of liability when you are transporting someone else's property.
